MEDICAL CENTER

ENGAGEMENT REPORT 2025/2026

Always Here, Always Caring

FOCUS

When I reflect on the past year at Greene County Medical Center, one word comes to mind: focus.

Our focus has always been clear – to strengthen the health and well-being of the communities we serve. Every decision we make, every investment we pursue and every service we provide begins with a simple question: How can we better meet the needs of our patients, families and neighbors?

This year, that focus was demonstrated in many ways. The most visible was the completion of our new MRI suite, a transformative, \$3.3 million project that now provides local access to advanced diagnostic imaging and reduces the need for patients to travel for care. What began as a vision years ago became a reality through community support, donor generosity and a shared commitment to ensuring high-quality healthcare remains available right here in Jefferson.

But our story this year extends far beyond a single project.

We expanded access to specialty care through new services, strengthened our Team with talented providers and leadership development opportunities and created new ways to connect with the communities we serve.

Throughout the year, we were reminded that healthcare is more than facilities, technology or services. The core of healthcare revolves around its people.

It is these people who spearhead the community engagement, which remains at the heart of our mission.

This is reflected in the partnerships, volunteerism, philanthropy and everyday acts of care that strengthen the health of our region.

I am grateful for the dedication of our boards, volunteers, donors, community partners and Team Members. Their commitment allows us to fulfill our promise of being *Always Here, Always Caring* today and well into the future.

As you look through this overview, I hope you see not only our accomplishments, but the impact we can achieve together and the mutual trust, respect and support we provide each other.

Thank you for your confidence in Greene County Medical Center. Because of you, we remain focused on what matters most – our people and our communities.

With sincere gratitude,

Many find that living here is like having a large family who cares about each other and interacts often in daily living. Teachers, physicians, shopkeepers and city workers are also neighbors and friends.
