

## Why choose Long Term Care?

Here in Long Term Care, we strive to make our facility truly feel like our residents' "home." Our staff become extended family in many ways — and they take a vested interest in the residents they serve.

Our nursing staff has approximately 180 years of total experience, averaging 15 years per nurse. Nurses are required to continue their education throughout their careers and attend continuing education courses during the year.

A large number of our certified nurse aides (CNAs) have more than 10 years of work experience. Our CNAs are extremely vital to the care of our residents.

# Long Term Care

We add *life* to days!

An Affiliate of  UnityPoint Health

## Long Term Care offers:

### **Residents' Rights**

We focus on residents' rights and promote independence. Residents and their families are educated about their rights upon admission by the social worker.

### **Proximity to Health Care**

Our location is very appealing to residents and families. We are just an elevator ride away from main hospital services and the emergency department — just to name a few.

### **Nutritional Services and Dining Options**

We have two registered dietitians on staff who follow the nutritional status of all residents. Residents are able to select food items from a menu. Snacks are offered throughout the day.

### **Consistent Care Approach**

Long Term Care has consistent nurses and aides that work with the same residents daily. This allows our staff and residents to build relationships. The staff knows how their residents want things done, and they can detect changes in their residents because they see them regularly.

### **Activities**

We have a full-time activities coordinator who plans activities to meet residents' social needs. She offers many group activities as well as assists those who prefer self-directed activities.

### **Laundry and Housekeeping Services**

We have housekeeping services around the clock. Laundry service is also provided.

### **Beauty Shop**

We have a beauty shop onsite that is staffed by a licensed beauty operator. It is open every Monday.

## Rooms at Long Term Care

There are three types of rooms available in Long Term Care:

### **Semi private**

Also known as a “double,” this room is shared with another resident. There is a shared restroom with a toilet and a sink

### **Private**

A room designed for one resident. Most private rooms offer a restroom that is shared with another resident. The restroom contains a toilet and a sink.

### **Suite**

A private room that is larger than a standard private room. Essentially, a suite is a “double” sized room designed for single occupancy. Some suites share a restroom with another suite while other suites have a private restroom.

At any time, there may be a waiting list for the rooms listed above. Please contact the Long Term Care director or social worker to request an application.
